Enhance Biodiversity

Join Us to Protect Our Territory's Natural Heritage

PRESERVING THE BALANCE

Welcome to the Maritim Resort Calabria, overlooking the crystal-clear Ionian Sea and immersed in an area that blends nature, history, and culture in a fascinating balance.
Ionian Calabria is an authentic and surprising land: from the golden beaches of Villapiana, framed by lush pine forests, to the Pollino and Sila Greca mountains, where forests, rivers, and gorges preserve pristine landscapes. Biodiversity here is rich and varied: along the coast, you can encounter marine species such as dolphins, while inland, golden eagles, roe deer, and unique Mediterranean plants, such as mastic and wild myrtle, live.
Our commitment to sustainability translates not only into eco-friendly practices adopted within the hotel, but also into our desire to raise awareness among our guests about the importance of environmental protection. Preserving local biodiversity is essential to preserving the beauty and authenticity of these landscapes, ensuring the well-being of the ecosystems and communities that inhabit them.

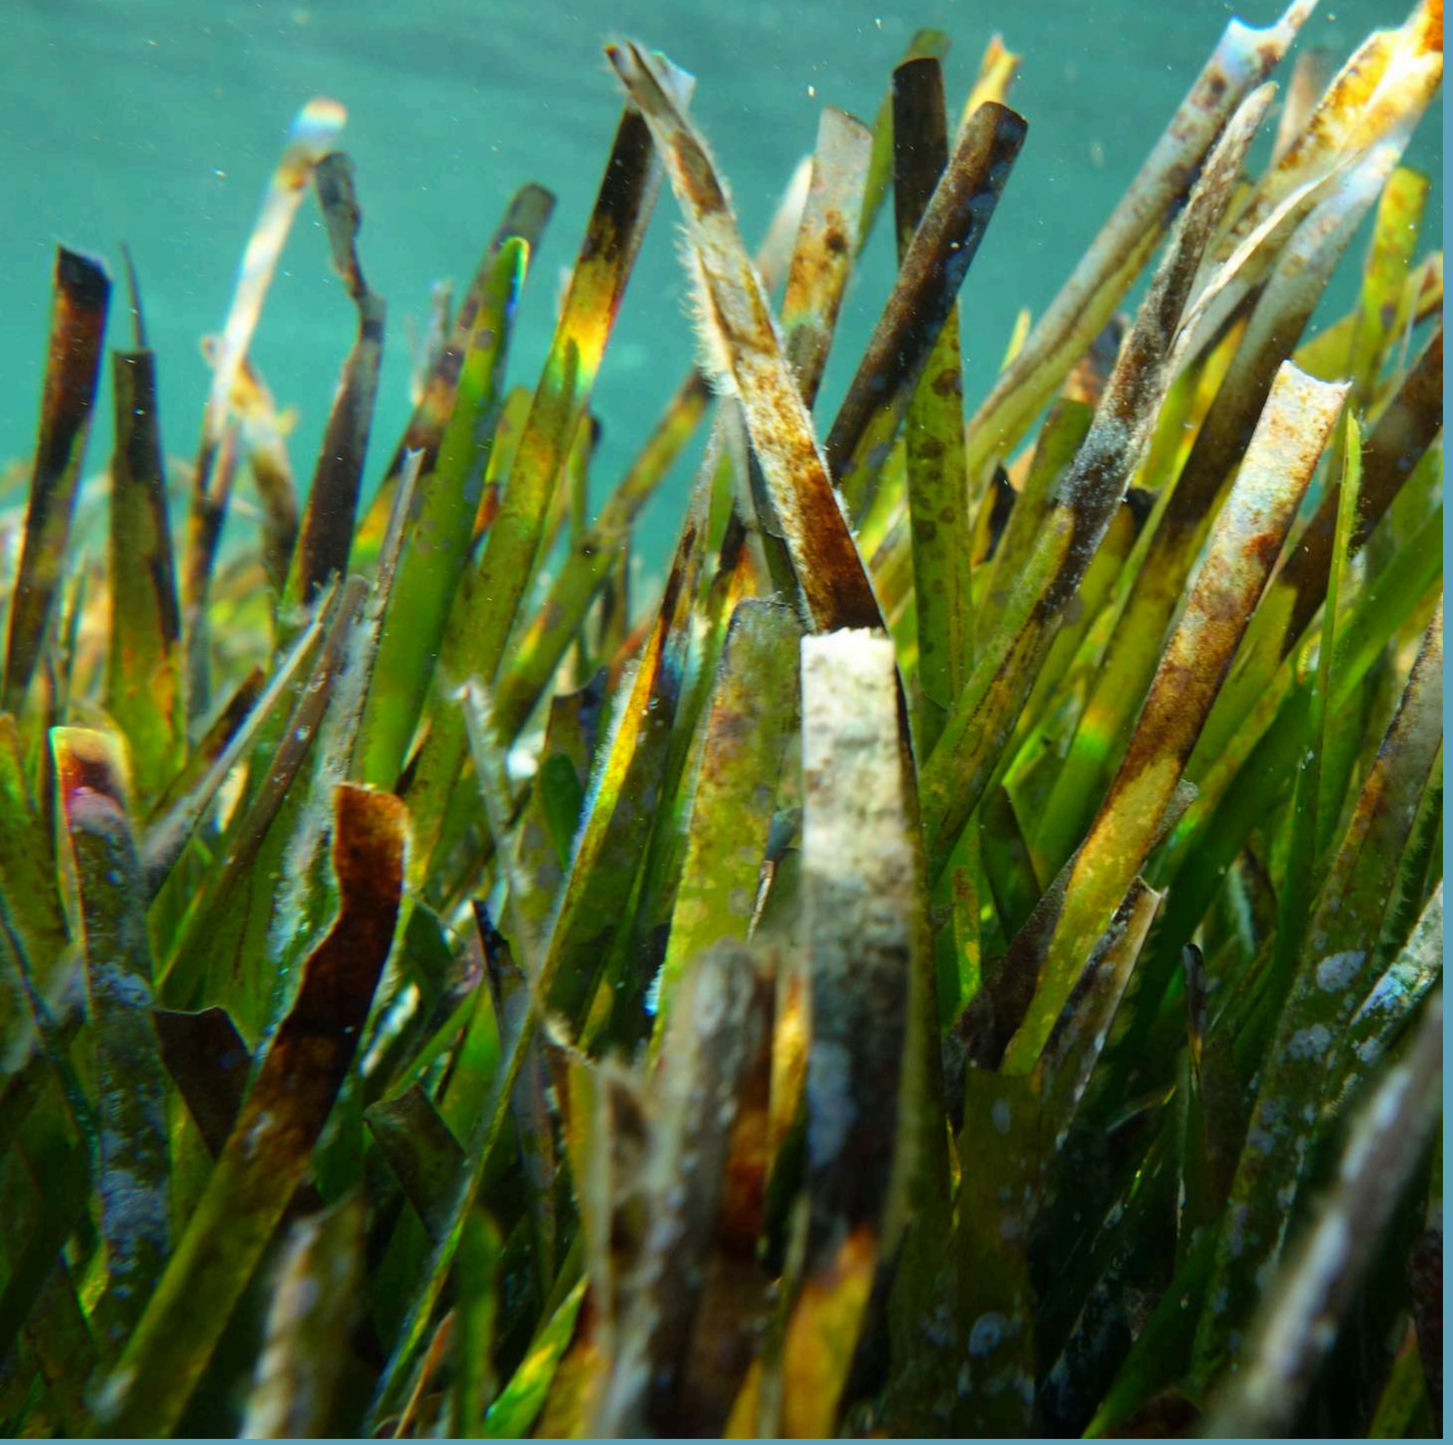

We invite you to discover the natural and cultural wonders of Calabria and enjoy a stay that respects and celebrates the uniqueness of this extraordinary land.

Why is biodiversity essential?

Biodiversity is not just about the beauty of nature, but also its ability to sustain life. Every species, from the smallest plant to the largest animal, plays a crucial role in maintaining the balance of the ecosystem. Protecting biodiversity means protecting the air we breathe, the water we drink, and the food we eat, helping to make the environment more resilient to climate change.

We must protect
We cannot just admire.

THE IONIAN SEA

The Ionian Sea, a marine environment that preserves a precious heritage. Its seabed is home to meadows of Posidonia oceanica, a marine plant essential to the health of the sea, providing refuge to seahorses, multicolored fish, and crustaceans. It's not uncommon to spot dolphins offshore, a symbol of the vitality of these waters.

THE HINTERLAND

Behind the coast, biodiversity continues to amaze: coastal pine forests protect dunes and shorelines, hosting migratory birds that stop here on their flight routes. Heading inland, the Pollino and Sila Greca mountains offer completely different landscapes: forests of beech and larches, habitats for golden eagles, Apennine wolves, roe deer, and an extraordinary variety of wild orchids.

This balance between sea and mountains, between Mediterranean environments and mountainous areas, makes Ionian Calabria a unique place, where biodiversity is an integral part of the landscape and the daily life of local communities.

A FRAGILE BALANCE

This biological wealth, however, is constantly threatened by urban sprawl, pollution, habitat fragmentation, and climate change.

The spread of invasive alien species, the use of pesticides, and the loss of natural soil reduce the capacity of the landscape to support wildlife.

THE IMPORTANCE OF CONSERVATION

Protecting local biodiversity is not only an ethical and environmental duty, but also an opportunity to improve the quality of urban life, make cities more resilient, and promote responsible tourism. Hotels, as permanent local outposts, can play an active role in protecting this natural heritage by promoting sustainable practices, supporting protected areas, and raising awareness among their guests about the uniqueness of local biodiversity.

Together we can make a difference

Thank you

We're committed to promoting and protecting our region's biodiversity, but we also need your help. Here's how you can contribute:

Choose sustainable tourism: Respect nature during your visits, avoiding behaviors that could harm it.

Support local products: Buy locally sourced products, thus supporting the local economy and biodiversity.

Every gesture counts: together we can build a better future, for ourselves and for generations to come.
